

# Safari Browser

Safari does not allow you to exclude a specific website for blocking cookies. We do not recommend that you allow all cookies. Follow the instructions below to restrict as few unwanted cookies as possible. A better recommendation is to use Firefox or Chrome which give you better cookie control.

1. Click the “Safari” at the top left of your window and then select Preferences.

2. Under the Privacy tab, you may select either Allow from the current website only or Allow from websites I visit.

Remember that you can always delete any cookies at any time by choosing the Manage Website Data link on this page.
